

eXact 2

The Next Generation in Color Measurement

Redesigned to meet the needs of print, ink, and packaging professionals, see how the eXact 2 can elevate your color measurements.

Ease of Use

Improved functionality and intuitive interface make the eXact 2 easy to use and train new operators.

Less Chance of Contamination

Non-contact recessed aperture minimizes ink tracking and smearing when measuring drawdowns, proofs, and finished prints.

Robust Design

Durable design that is both ergonomic and easy to grip.

Fast Video Measurement Targeting

On-board high-resolution camera and video targeting ensures the right spot is measured every time.

Efficient Print Inspection

Digital Loupe offers 10x zoom and integrated sync-to-computer capabilities to quickly inspect, check registration, and share measurements.

Enhanced Color Bar Scanning

On-board camera provides visual look ahead and color bar recognition, while integrated wheels switch from measuring individual patches to scanning color bars with just a tap.

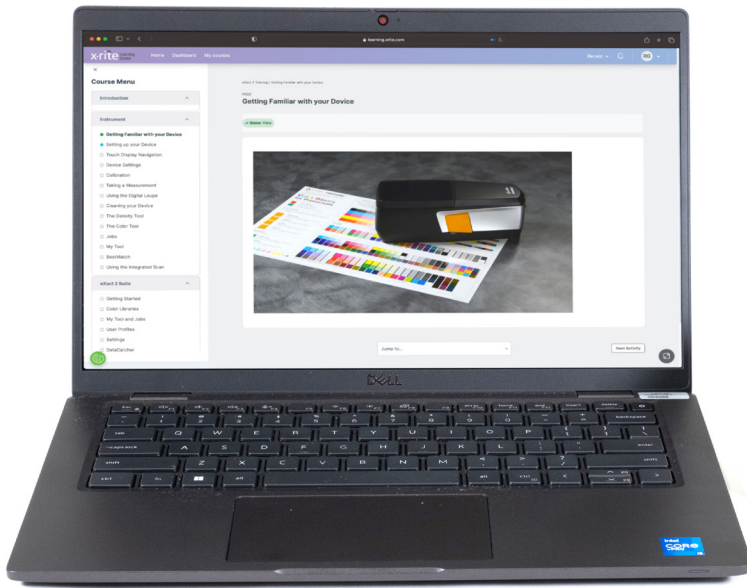

Secure Onboard Wi-Fi

On-board Wi-Fi enables operators to drive color measurement processes directly from the eXact 2 without the need to be near the computer.

Integrated Workflow Management

Software integration makes it easy to evaluate ColorCert® job quality results on the eXact 2 screen and simplifies ink workflows with InkFormulation Software (IFS).

Improved Device Navigation

Simplified menu structure and 30% larger viewing window with adjustable tilt screen reduce time looking through menus.

Complimentary Training Resources

Free eLearning course and instructional videos make training new operators quick and easy.

Preloaded Color Standards

Easy access to color standards with the ability to connect to PantoneLIVE to acquire thousands of additional colors across a variety of substrates.
